### *Broad Creek PSD's Policy for Underground Utility Boring/Drilling*

---

It is Broad Creek PSD's mission to: *Ensure the quality, reliability, and environmental sustainability of the treatment of water and wastewater while being economically sound.* With this in mind, Broad Creek PSD strives through this policy to reduce the impacts of underground utility boring/drilling to the patrons within our district.

#### **Broad Creek PSD's policy for directional drilling or boring is as follows:**

Directional drilling or boring Monday-Friday is allowed within the district from 8:00am until 4:00pm. There is no forward or backward movement of the drill or bore missile before or after this time frame unless approved by the district representative.

Directional drilling or boring in critical areas Monday-Thursday is only allowed within the district from 8:00am until 12:00pm. There is no forward or backward movement of the drill or bore missile before or after this time frame unless approved by the district representative.

Directional drilling or boring in critical areas is not allowed within the district on Friday unless approved by the district representative.

Broad Creek PSD classifies a critical area to be:

- Within 10' of a sewer force main, regardless of size
- Any roadway crossing in an area with heavy traffic loads
- Within 10' of a water main, 8" or larger
- Within 10' of an effluent water main
- In an area that would impact a large quantity of patrons if an issue were to arise
- In an area where utilities cannot be spotted by excavator; under asphalt, concrete or any other obstruction
